Need ideas for your twins' nursery, check out Inspired Crib Bedding

Inspired Crib Bedding is made of 100% cotton and an ultra soft minky fabric, giving the collection of nursery bedding an unmatched sense of softness and comfort. The colors and patterns in their collection will add a sense of modern sophistication to any nursery.

I found the bedding to be wonderfully constructed and every bit as soft and comfortable as the description implied. The colors were as fresh as the design. Once it arrived, I couldn't help but ponder how well some of their collections would blend together for the creation of a perfect twin nursery.

The geo pattern above is available in sage (pictured) as well as in pink and in aqua. Why not mingle the pink and sage, sage and aqua, or aqua and pink for an individualized yet complimentary twin nursery design? Their Geox collection also has lots of twin nursery possibilities.

In addition to bedding, they have coordinating wall decor, stroller blankets, bath towels, swaddlers, and support pillows. This array of coordinating items makes it easy for a busy parent of twins to order virtually all their decor in a few clicks of the keyboard & mouse. I must admit, I have my eye on a couple of those bath towels!

Another plus, all **Inspired Crib Bedding** products are crafted with care in the USA.
