### For the modern nursery: Inspired Crib Bedding

If you wish you instruct your little one in tasteful and modern styling, then check out [Inspired Crib Bedding](#). This West Coast based firm proudly flaunts their US made products including crib sheets, minky bath robes, stroller blankets and nursing pillows. I flicked through their hard print glossy flyer and I simply wanted everything. We were sent a cotton fitted crib sheet to review. The Geox Pink and Green \$35 sheet is patterned with a tasteful composite of light pastel crosses. We adored the stylish design.

Full crib bedding sets are also available which include a fitted sheet, a comforter cover, bumpers and a crib skirt. These will set you back around \$300, but if you insist on the very best, then you could do little wrong to sport your baby's crib with these exclusive sets. You too can drool over these delightful wares at [icribbedding.com](#).
