Inspired Crib Bedding

4/02/2009 Posted by Melissa

Where was Inspired Crib Bedding when I was searching for the perfect way to decorate Connor's nursery. I eventually got so fed up with the traditional options available that I made my own bedding. If I had seen Inspired Crib Bedding it would definitely have been the way I decorated my nursery. I love the fresh modern designs! The offer you everything you need to complete your perfect nursery from bedding to art prints. Too late to redo your nursery? You can still enjoy the sophisticated designs in the form of stroller blankets, pillows, and even hooded towels. The fabrics used are a combo of 100% cotton or heavenly soft minky. The gorgeous nursery pillow we reviewed was just the right size for my little one and so beautiful we proudly use it in our living room. One side is made with the 100% cotton and the other is the insanely soft minky. I want one of these for my bedroom! Take a moment to check out Inspired Crib Bedding and you'll discover something perfect for your home & child - start your baby off surrounded by great style. It's

stunning gift for that upcoming shower you have been trying to find the perfect gift for - I would suggest the super plush swaddler!
